*The Beach Chronicles* is nothing short of an extraordinary pulp-noir, sci-fi, animated graphic novel set in a style reminiscent of the hard boiled detective movies of the 1940's and 50's. Infused with a backdrop that is both current and yet eerily "other" world. The series grips you from the very first scene with intricate detail that transports the audience to another time and place. Dirk Jenson is a private detective that is jaded by a life veiled in duplicity and seeped in death and murder. He lives and works in Miami "South" Beach; a cog in the machinery that has long casted a reputation for attracting and producing not only some of the richest most famous people in the world but also killers, whores and everything in between. A constant exposure to the under belly that that is the facade of South Beach creates a character in Dirk that is both hardened and self serving. Dirk stands for one thing and one thing only; himself. But one night, everything changes; all hell breaks loose and a brutal, unrelenting assault is waged on Dirk and his comrades. The reason is a total mystery to Dirk and his friends. Thus begins the genesis of the chronicles and the unfolding of a galaxy of seemingly unending lies. Featuring the voice talent of Jimmy Jean Louis (star of the hit television show *Heroes* and the film *Tears of the Sun*) this is the first in the series that weaves intrigue, dynamic animation and a riveting story that effectively integrates past, present and future into a tale of the ultimate betrayal.
